

[Iora Health named #3 "Most Innovative Company" by Fast Company](#)

**Iora Health** is seeking a Primary Care Physician to join our practices in **King County (Federal Way and Renton)**. We have a total of 6 practices in Washington and we are growing!

**Position Highlights:**

- Live Iora's mission of "restoring humanity to healthcare", for patients and for yourself.
- Rediscover the "joy in practice" while working in a value-based care environment with a team to support you in delivering high quality patient care.
- Provide best in class comprehensive primary care in an outpatient setting.
- Partner with care team and leverage Iora's coaching and integrated behavioral health models to engage our geriatric patient population in care and drive behavior change.
- Our practices offer smaller panel sizes and the opportunity to lead while working with a true team.
- Utilize our proprietary Electronic Health Record to plan care for individual patients and maximize impact on the population.
- State of the art practice setting designed for a team-based practice model
- Leadership that values your input and understands the importance of work/life balance
- Weekly protected time during the work day, to gather with fellow Iora physicians for team building and shared discussion of challenging cases.

**Qualifications:**

- Board certification in Internal Medicine, Family Medicine, or Geriatrics required.
- Currently licensed or ability to obtain licensure in the state of Washington.
- The ability to build successful relationships with team members and communicate effectively both 1-on-1 and in groups.
- Can thrive in a fast-growing, mission driven organization focused on using data to improve patient outcomes.

**About Iora:**

Iora Health is transforming health care, starting with primary care. We created a high-impact relationship based care model, that particularly benefits adults on Medicare and those who might need more attention. Our care model changes everything - the team, outcome-focused payment, customer service, and the technology that supports our care.

We know that when you invest in relationships with people, you can help them live happier and healthier. Our patients get a team that respects and listens to them. We get paid to keep our patients healthier, and it works - we are successfully improving the lives of our patients while lowering costs.
